

Greg Bartelt has been involved in the field of concrete restoration and general construction for over 15 years. For the past 5 years he has acted as supervisor on the installation of synthetic geomembrane systems on dams for numerous CARPI projects in the USA and abroad. First, as a subcontracted project manager for Contech Services Inc., and presently working directly for CARPI USA Inc., since November 2005. Greg was responsible for the installation of the waterproofing geomembrane system on the face of the Olivenhain RCC dam in southern California, the Salt Springs concrete faced rockfilled dam(CFRD) for Pacific Gas & Electric(PG&E) in northern California, the Strawberry CRFD (PG&E), the Sabrina redwood faced dam for Southern California Edison and the Karahnjukar CFRD in Iceland.
