

Rob Lang holds a BS, MS and Ph'd from the Civil and Environmental Engineering University of California at Davis, and is a licensed Civil and Environmental Engineer. He is currently Dean of the School of Engineering at UAA, and a Professor of Civil Engineering, and received a Professor Emeritus of Civil and Environmental Engineering from Cal Poly State University at San Luis Obispo. Prior to entering academia, he was Chief Engineer of a Water District in Southern California, where he managed the design and implementation of large-scale water conservation projects to help meet the demands of Los Angeles and San Diego counties for additional water from the Colorado River. He has numerous publications in the areas of water and wastewater treatment, water conservation, environmental modeling, and seismic safety.
