

Tony Slaton Barker has been Environmental Engineer, Civil Engineer, Structural Engineer, and Project Manager throughout Alaska. He has been involved in all types of construction, renovation and site cleanup projects for over 13 years. He has a Masters degree in Civil/Structural Engineering. Additionally he has been a Licensed Professional Civil Engineer in Alaska since 2000. In 2000 he began work on structural construction administration for the new Anchorage Airport C Concourse construction. A major effort was made to reduce time, material costs, and effort when making structural modifications during the 4 year construction period. Mr. SlatonBarker has been an LEED Accredited Professional - Leadership in Energy and Environmental Design, since 2003, as well as a member of the Alaska Chapter of the USGBC since 2004. He has participated in week long design charrette for a new dormitory on Elmendorf Airforce Base (proposed LEED certified). He has assisted in design for remote Alaska village wind-diesel power plants, including site work and foundation design for the wind turbines.
